## Social Media Sources

Local influencers and members of the Sudanese diaspora have been sharing community appeals and requests for support and advice on a wide-range of issues. Since the onset of the conflict in Sudan, individuals are intentionally seeking out influencers or individuals with a sizeable follower base, to access information that is perceived as more reliable and ensure visibility for their needs and concerns to a wider audience.

Public and private groups on Facebook have changed their focus to share relevant information on humanitarian assistance and urgent calls for help and support. For example, a private women's group on Facebook where marital problems were usually discussed, is now amplifying appeals for healthcare support and evacuation routes.

New spaces have also emerged on social media platforms. For instance, on LinkedIn, a space has been created to share employment opportunities for Sudanese people who lost their livelihood due to the conflict. The importance of social media in providing vital assistance and support to people affected by conflict in Sudan cannot be underestimated.
