

STRENGTHENING INFORMATION ECOSYSTEMS TO DRIVE BIODIVERSITY CONSERVATION IN THE AMAZON

Through the Together for Conservation project, Internews is implementing an innovative initiative to strengthen and complement conservation efforts while ensuring peoples' right to access information.

1.

Information Ecosystem Research (IER) to strengthen governance and empowerment at the local level.

2.

Organizational Capacity Assessments (OCA) and technical assistance to media outlets and CSOs.

8.

Mentoring for indigenous and community journalists and/or communicators.

7.

Grants for journalists and/or indigenous and community communicators.

3.

Digital Security tools management and Training.

4.

Activities to bridge the gap between scientists and journalists.

6.

Grants for local media outlets.

5.

Training on investigative journalism and data management tools.
